MAHD STRATEGIC PILLARS

- Talent Identification
- Talent Development
- Sports Innovation and technology

AGENDA

MoS vision, Mission and Sector Entities

Digital in Sport

Key learnings from the leading countries

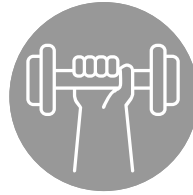

Q&A Session

CORE SPORT STRATEGIC PILLARS

Elite performance

Mass participation in sport and
physical activity

Talent development
pathway

WHAT IS ULTIMATE SUCCESS OF THE KSA SPORT SECTOR DIGITAL STRATEGY?

**Global
recognition**

Be the
global leader
for digital in
sports

**Innovation
&
enrichment**

Drive digital
innovation and
advancement in
sports

**Full
potential**

Enable the KSA
sports sector to
achieve its
full potential

Social

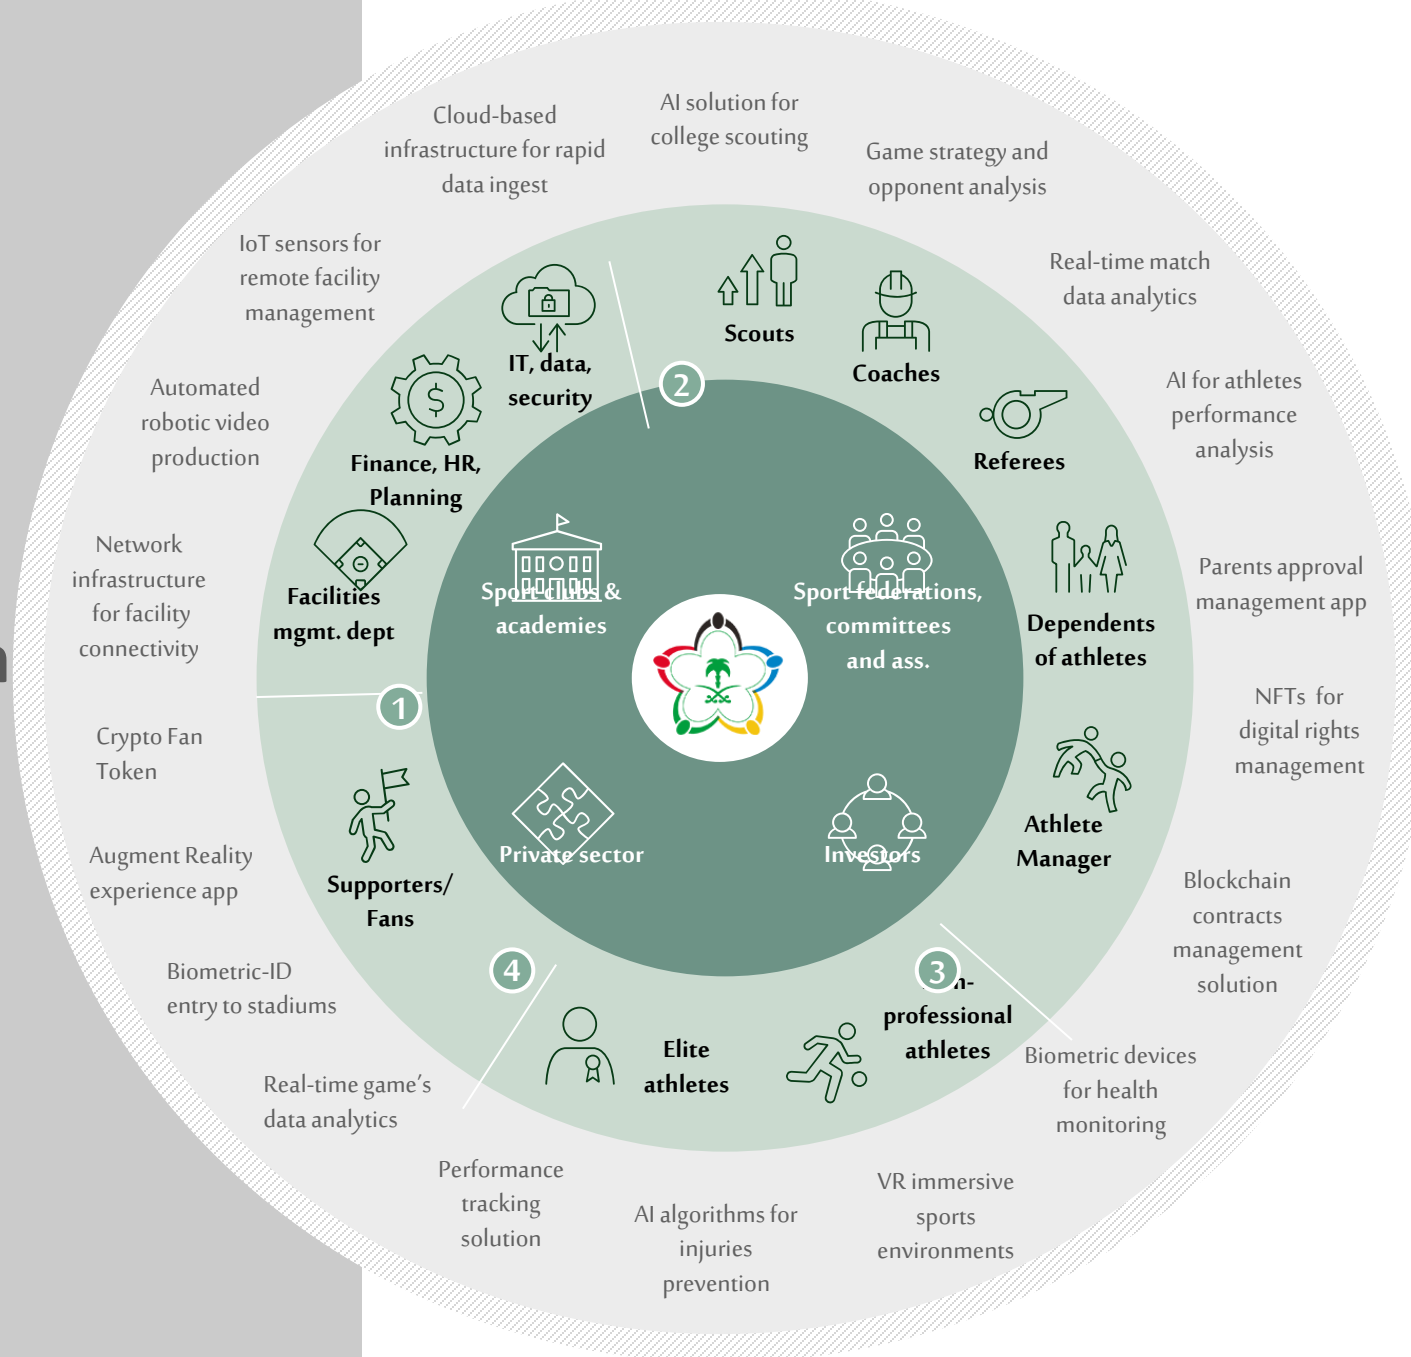

Leverage digital
to drive social
inclusion & bring
people together

**Digital
excellence**

Redefine the
global standard
of digital
excellence in
sports

Digital Transformation in the Sports Ecosystem

SPORT-RELATED ORGANIZATIONS

END USERS

User of services offered by the Sports entities

- ① Sport Organization Corporate Employees
- ② Athlete network
- ③ Athletes
- ④ Supporter/Fans

DIGITAL USE CASES

DIGITAL USE CASES ACROSS DIGITAL ENABLERS FOR THE SPORT ECOSYSTEM

1 Infrastructure, Network, and Cloud

Cloud-based sport management systems

Data storage and backup solutions

Network infrastructure for stadium/ venue connectivity

Security & data privacy solutions

2 Advanced Analytics and Big Data

Athlete tracking and biometric data analysis

Game Strategy and decision-making

Sports sponsorship and marketing analysis

Automated scouting and talent identification

3 Artificial Intelligence & ML

Fan attitude analysis for marketing & engagement

AI-Predictive injury analysis and prevention

AI-powered virtual coaching and feedback

Generative AI for personalized content creation

4 VR, AR, MR and broadcasting

Virtual reality-based training simulations

Virtual fan experiences and immersive content

Augmented reality for in-game statistics and overlays

Virtual reality injury rehabilitation

5 Digital Engagement solutions

Mobile ticketing platforms

In-Game Experiences platforms

Digital fan loyalty programs and gamification

In-stadium mobile ordering platforms

6 Blockchain (incl. Tokens and NFTs)

Blockchain-based ticketing and secure transactions

NFT-based collectibles and memorabilia

Tokenized fan ownership and rewards

Blockchain-based media rights management

7 IoT, Wearables, and Motion Sensors

Athlete performance tracking with wearables and sensors

IoT-based safety and security solutions

IoT-based facilities management solutions

Wearable technology for fan engagement

8 Robotics and Sport Hardware

AI-powered sport cameras and drones

Accessibility and inclusivity robotic devices

Robotic training and rehabilitation assistants

Computer vision and robotics technology for referee support

9 Back-Office applications

Back-office data entry and record management automation

Facility management systems

Automated financial reporting and compliance

Sports Content Management Systems

AGENDA

MoS vision, Mission and Sector Entities

Digital in Sport

Key learnings from the leading countries

Q&A Session

BENCHMARKING

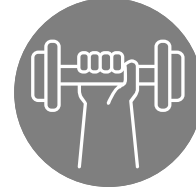

ATHLETES: *Athletes are at the core of the sport sector*

Leading countries **embrace technology to digitize and simplify** every **athlete interaction with the sport** across the lifecycle (registration, booking, scouting, health, development, performance, etc.)

ENTERTAINMENT: *Sport viewership competes against all other forms of entertainment (e.g., retail, movies, non-sport streaming)*

Leading teams / clubs in digitally mature countries **engage fans digitally across the entire user journey** to increase viewership & revenue

MASS PARTICIPATION: *Digitization at mass participation level remains a challenge*

While most **leading countries have higher digital maturity at elite levels**, **digitization at mass participation levels remains a challenge**

DATA: *Data forms the foundation for digital transformation and maturity*

Data for athletes and fans is collected at every touchpoint and analysed for personalized and improved interactions

وزارة الرياضة
Ministry of Sport

DATA IS A FOUNDATIONAL RECURRING THEME ACROSS USE CASES AND ENABLERS

1 Monitoring Systems

Must-have hygiene factor to collect & analyse data

Provides data to teams to analyse trends / player performance to **alter in-game strategies**

Automation of line calling

2 Wearables

Established tech **witnessing regular innovations**, primarily for athletes perf.

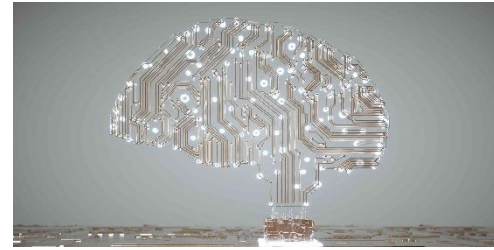

Players leverage shooting sleeves, performance socks & other wearables to **collect advanced metrics**

Tracking data to help **prevent injuries**

3 AI / ML

Forefront of disruptive tech – implicated in most trends across stakeholders

AI and 3D technology to inform audience of **offside decisions**

Design AI agents to simulate player behaviour and test **game tactics**

4 VR / AR

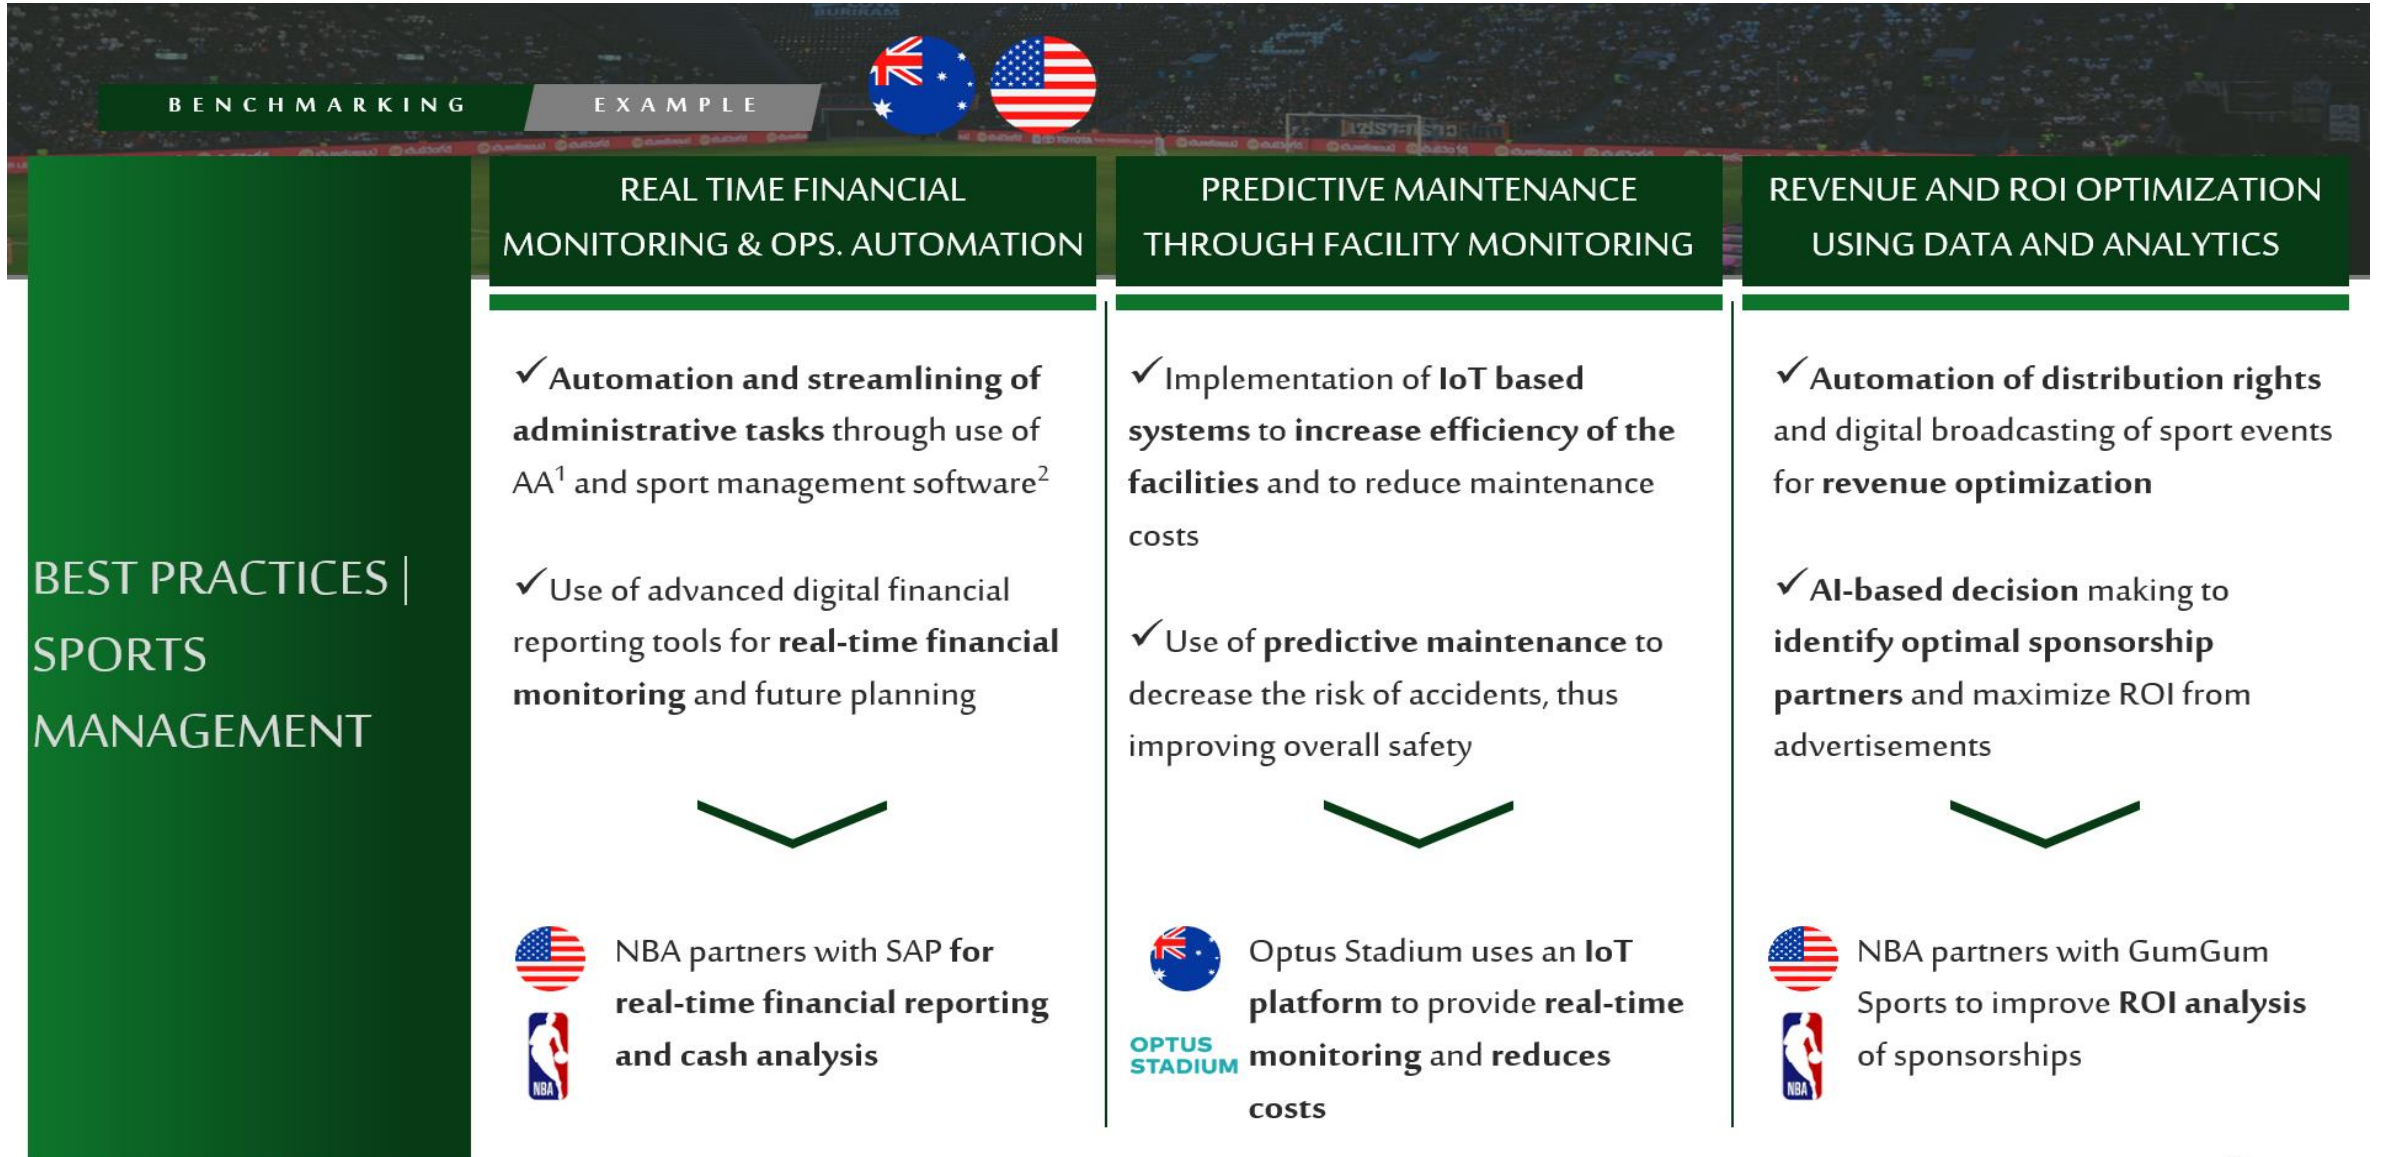

Nascent, gaining traction; used to drive personalized fan engagement and devise new trainings

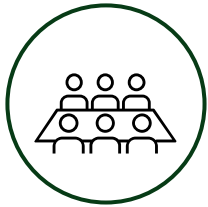

Racers use immersive VR to **train in almost realistic env.** without wear and tear on body

Pioneering VR broadcasts in 22/23 season, but still at **very early stage** with only 4% games available

THE END

What is your Ambition?

Any questions?
